

Conflict Minerals Declaration Statement

Date: July 2, 2025 Version 1.0

Maple Mold Technologies is committed to responsible sourcing and supports efforts to eliminate the use of minerals that directly or indirectly finance armed conflict in the Democratic Republic of the Congo (DRC) and adjoining countries. These minerals include tantalum, tin, tungsten, and gold (collectively referred to as "3TG").

Products without metallic components

For plastic injection molded products that do not contain any metallic components, Maple Mold Technologies hereby declares that, to the best of our knowledge and based on reasonable inquiry with our suppliers, these products do not contain tin, tantalum, tungsten, or gold (3TG) and therefore fall outside the scope of conflict minerals reporting requirements.

Products with metallic components

For plastic injection molded products that do contain metallic components, Maple Mold Technologies:

- Requires suppliers to provide information on the source and chain of custody of 3TG minerals.
- Encourages suppliers to source materials from conflict-free smelters and refiners validated by recognized industry programs (such as the Responsible Minerals Assurance Process).
- Strives to ensure that any 3TG minerals used are sourced in a manner consistent with the Organization for Economic Co-operation and Development (OECD) Due Diligence Guidance for Responsible Supply Chains.

Commitment

Maple Mold Technologies is committed to providing customers with products that meet applicable regulatory requirements and to supporting global initiatives to ensure ethical mineral sourcing.

Should any changes in the substance content occur, or new SVHCs be introduced into the materials used, Maple Mold Technologies will take appropriate steps to evaluate and notify customers accordingly.

Please feel free to contact us with any specific compliance documentation needs or additional information requests.*

Maple Mold Technologies (Valid without signature)

* This statement is subject to change without notice and becomes obsolete in case of any changes to regulations referenced, or in case of any changes to the product's composition, or in case a new version is issued. New versions of this statement will either be published on our website or are provided to you upon request. Please always consult either our website or contact your Maple Mold account representative to request the current version of this statement.
